8" Flue Extension
2 Piece

D) 11.5" FIREBOX EXTENSION

11.5" Firebox
Extension

About Firebricks

All fireplaces and pizza ovens require firebricks to line the inside of the fireplace. The flue sections include terra cotta inserts that are flame resistant, but the concrete base in the burning chamber must be protected with firebrick. It is important that flame does not directly impact the concrete shell.

The firebricks we carry come in two sizes:

Brick Splits

Full Bricks

Full bricks are often used to line the floor whereas split bricks can line the sides.

Additional Installation Supplies

Multi-Purpose Ready Mix Mortar (For connecting pieces of the base fireplace as well as to set firebrick)

- Low moisture absorption after curing
 - Allows plenty of working time without the risk of flash setting
 - Complete, start-to-finish mortar blend in a single package, simply mix with water
 - Withstands high temperature conditions encountered by wood burning hearth products
 - Provides superior performance in fireplace, fire pit or oven joints, as well as firebrick installation
- Incorporates a bonding agent to facilitate the adhesion of finishing materials

Veneer Mortar (For applying veneer stone to the base fireplace)
